

Katra Auto Engineering Private Limited

Financials

FOR THE PERIOD

(1st April 2022 – 31th Mar 23)

Katra Auto Engineering Private Limited

Notes forming part of the Financial Statements for the year ended 31 March 2023

1. General Information

Katra Auto Engineering Private Limited is a Company incorporated in India under the Companies Act, 1956. Its principal activity is providing of auto engineering services.

2. Significant accounting policies

Significant accounting policies adopted by the company are as under:

2.1. Basis of Preparation of Financial Statements

(a) Statement of Compliance with Ind AS

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the "Act") read with the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

Accounting policies have been consistently applied to all the years presented except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

(b) Basis of measurement

The financial statements have been prepared on a historical cost convention on accrual basis.

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. The Company has ascertained its operating cycle as twelve months for the purpose of current and noncurrent classification of assets and liabilities.

(c) Use of estimates

The preparation of financial statements in conformity with Ind AS requires the Management to make estimate and assumptions that affect the reported amount of assets and liabilities as at the Balance Sheet date, reported amount of revenue and expenses for the year and disclosures of contingent liabilities as at the Balance Sheet date. The estimates and assumptions used in the accompanying financial statements are based upon the Management's evaluation of the relevant facts and circumstances as at the date of the financial statements. Actual results could differ from these estimates. Estimates and underlying assumptions are reviewed on a periodic basis. Revisions to accounting estimates, if any, are recognized in the year in which the estimates are revised and in any future years affected.

2.2 Property, plant and equipment

Property, plant and equipment are stated at historical cost less depreciation. Cost comprises the purchase price, borrowing costs, if capitalization criteria are met and any cost attributable to bringing the assets to its working condition for its intended use which includes taxes, freight, and installation and allocated incidental expenditure during construction/ acquisition and exclusive of CENVAT credit or other tax credit available to the Company. When parts of an item of tangible fixed assets have different useful lives, they are accounted for as separate items (major components) of fixed asset.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to Statement of Profit and Loss during the year in which they are incurred.

Transition to Ind AS

On transition to Ind AS, the Company has elected to continue with the carrying value of all of its property, plant and equipment recognized as at 1 April 2016 measured as per the Indian GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

2.3 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- ▶ In the principal market for the asset or liability, or
- ▶ In the absence of a principal market, in the most advantageous market for the asset or liability accessible to the Company.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- ▶ Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ▶ Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- ▶ Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

2.4 Revenue Recognition

Revenue is recognised to the extent, that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Revenue from sale of goods

Revenue from sale of goods is recognised when the significant risks and rewards of ownership of the goods are transferred to the buyer and are recorded net of trade discounts, rebates, Sales Tax, Value Added Tax and gross of Excise Duty.

Revenue from services

Revenue from services is recognised pro-rata over the period of the contract as and when services are rendered and the collectability is reasonably assured. The revenue is recognised net of Service Tax.
